Terms of use: For help, contact: autocad-support@autodesk.com Telephone: +1 732 821 8911 Here's a catch-22 in sports: If a player or team is known for playing "dirty," chances are they'll get caught. That's because, in the eyes of the law, there's a big difference between getting a concussion from hard contact and getting a concussion from playing "dirty." The NCAA and other leagues typically only investigate and punish head trauma in sports. So when a player or team is accused of playing "dirty," it tends to go unreported or gets swept under the rug. And that's why there are so many strange stories, like the one involving Kobe Bryant, about this bizarre trend. But it's also a bizarre trend because, like with other illegal and dangerous practices in sports, it's actually safer and a more effective way to play the game. Here are 10 of the weirdest examples of "dirty" play. 1. Kobe Bryant and the Statue of Liberty play It's December 2004, and the Los Angeles Lakers are playing the Detroit Pistons. Kobe Bryant hits a shot as he's coming off a screen, and it's a layup — and it looks like this: This particular style of shot is legal, but it's a style used by players who want to overpower their defenders. So after Bryant's shot, he leads, and a whole mess of Pistons players come running to meet him. As they come down the court, it looks like this: As you can see, all of these Pistons are trying to hold up the defender so he can't get a hand on Bryant and cut down the shot. It's a defensive strategy that looks a lot like "dirty" play. But "dirty" play in the NBA works like this: If a defender is close enough to a player who's attempting to get a shot off, he can be called for goaltending the ball and therefore giving up an easy shot. And that's exactly what happened here. How does this work
