Q: find the smallest number from a list in python I am trying to find the smallest number from a list. I have tried this: `smallest=min(k for k in list)` How can I check if the element is the smallest from the list? A:

A more Pythonic way would be to use `enumerate` and `min` with `functools.partial`:

```
import functools def min_if( d0c515b9f4
```
