If you are using Deli, make sure you use the recommended version I'm having a strange problem. I have an amazon kindle app that I've just upgraded. My kindle is now stuck in the 'Goggle mode' when browsing the web. I can't read books, and can't even open a web page. However, my kindle syncs fine. Not sure what the problem is or what to do... I used it on windows and it worked great but it won't work now with 2.8.1. with the new version it's not working. it says 'connecting to amazon' and doesn't do anything more than that. do I need to uninstall and reinstall the app?At the same time, the Montana Supreme Court could soon hear a case involving the state's largest landowners and, in all likelihood, decide one of the most important property rights questions
