The tool can deal with a wide array of video formats and can rip audio from video. It also supports subtitles, chapters and video effects. As for its result, you are offered a variety of output formats (e.g. MP3, WAV, WMA and M4A). After you initiate the conversion process it takes a minute or two to get it done, and you can pause or resume it at any time. On top of that, the program comes with a fair amount of tools such as chapter marking, audio extraction, and so on. Another thing to note is that you can generate the output folder for the converted file by yourself as you want. The only thing that users may find annoying is that the program has no help or tutorials. As a result, you have to rely on its own features when doing the job. We haven't experienced any problems with this issue, though. All in all, YouTube to MP3 Converter is a decent tool that may be a perfect choice for converting online videos. It is fairly easy to use, gets the job done and is not expensive in any way. Cine
