So, just one week left to get the game I've had in the works for 5 years. This has been an epic project, made possible by my lovely wife, who has stuck with me through every failed iteration of this game. I'm honored to have her on board, and that I can call this a successful project. The story so far: So, as the game begins, the player character, Flappy, has just arrived on a beach town. He tries to fly through the air, but gets sucked into a hole and is captured by a harem. The harem explains that Flappy has to find the unknown party that controls the end-of-the-world clock bomb. Flappy's only hope to beat them is if he can somehow escape the hole in the ground. He can't fly as high as he'd like, but there are lots of obstacles and pitfalls for him to go through. He must gather magic shards and make his way through the treacherous lands where he'll face deadly enemies and the clock bomb. The video from the game (part of a planned trilogy) will be live on Friday on my YouTube page: As you can see, the development of the game started 3 years ago and it's now finally become a fun
