There's many reasons which can keep you from purchasing a good e-book. The main reason is that most e-books cost a considerable amount of money, and many potential buyers would really prefer to get their e-books for free. A second reason is that as people get older, they tend to accumulate more books than they can read in a lifetime and they are thus forced to shelve many books, as a result of which, even a "free" e-book may seem very expensive to these readers. For these reasons, I'm glad to announce the release of a new, free e-book, in which I explain the concept of and give a recipe for positive thinking. This recipe is based on the principles of cognitive psychology and is as effective as any cognitive therapy. This e-book has a total of 37 recipes to help you think more positively. I hope that after reading this book you will see the difference between positive thinking and negative thinking. I would encourage you to write a short comment about what you personally think when reading these recipes. I think it can be very valuable to share your thoughts and to get help from others. The development of this new e-book took two years. It was

difficult to focus on this project, as I'm always busy with my work on the web site, and when I have time, I work on personal projects. Over the past two years, I also had to make a very important change on this web site, so a considerable amount of resources were needed in order to complete the new e-book. Fortunately, I have found help to make all these tasks easier and faster, and I greatly appreciate it. I would like to thank all the helpers who have so far helped me, and I am grateful to all those who have participated in the development of the book, particularly: Stöver, Theano, Jord, and Robert Byrne, who provided invaluable help in the development of the book. I am also indebted to Charles Lundius, Staksoft, and Hans Willem, who made the book become a reality. Thank you! Philip Kotler In this book, I look at people who have succeeded in various fields, both in business and in life, and I study what they have in common. I am convinced that we can all learn a lot
