[download]_p.d.f\$@@ Principles of Managerial Finance 14th Edition Pearson. Published in: Design. This book is a reprint of the U.S. edition of Principles of Managerial Finance (14th Edition). The author is Lawrence J. Gitman (1943-). The present U.S. edition includes a new chapter on the CFA Institute's discussion-based exams. This text has been used by many students as a key resource for examination preparation. The U.S. edition has been completely revised and expanded in line with the new world of financial markets and business. It begins with a review of basic business concepts and then moves on to the analysis of price and earnings valuations. Later, it analyzes the financial characteristics of a company and the role of financial statements in the management process. The text also provides a comprehensive coverage of managerial accounting and the new FASB framework for financial reporting. Finally, the reader is treated to analysis of key concepts such as opportunity cost, business ethics, sustainability and operations management. This latest edition of Gitman's Principles of Managerial Finance has been updated, enhanced and restructured. The first section contains a review of basic business concepts. The rest of the text proceeds through a chronological approach. The most salient feature of this text is the discussion-based approach to learning, supported by a large collection of worked exercises. The text contains a wealth of practical examples and case studies that will enhance the understanding of the student. The text has been extensively cross-referenced and indexed, ensuring maximum efficiency. A DVD-ROM contains tables, figures and an extensive glossary. The principles of managerial finance has been designed to be an effective introductory text, enabling the student to move smoothly into the subject of financial accounting, and a solid review of managerial accounting. The book is organized logically and systematically to fit the requirements for preparation and examination of the CFA.
